

Informed Consent Solution

Time for a Change

Informed Consent by Interlace Health does away with paper, clipboards and scanners - and allows staff to collect an eSignature from the patient at the bedside or during an appointment. The form is then instantly available to the care team, anywhere, anytime, and on any device.

Our solution provides a better way to capture patient signatures and addresses many common challenges.

67% of consents are missing on the day of surgery

14% of surgeries are delayed due to missing consents

50% of clinicians report burnout from paperwork

Achieve Your Goals

Our solution is EHR agnostic and provides:

- Customized implementation to meet process needs
- Seamless integration into current process & workflows
- Instant patient identification & form selection
- Automatic compliance
- Reduced staff burden & burnout

Transform Your Process

Interlace Health designed the first electronic Informed Consent with both the patient and clinicians in mind.

- Instant form selection
- Virtual patient signing
- Faster form completion
- Prompt review & action
- Reduced staff burden
- Improved Compliance
- Enhanced education

Why It's Better

Interlace Health has been providing solutions that solve workflow challenges for 28 years. We understand the needs of healthcare organizations and have developed key features that make their processes easier.

- EHR agnostic
- HL7 & FHIR integration
- Discrete data capture
- Dynamic form fields
- ORM/ADT messaging
- Flexible Dashboards
- Barcode scanning
- Mobile UX
- Unlimited signature capture

Measure the Value

On average, our customers are experiencing:

10+ minutes saved per consent completed

2-3 days faster archiving per consent
